EDUCATION

GLA University, Mathura 2024 – 2028
Bachelor of Technology in Computer Science **CPI: 8.8**

Adani Public School — Intermediate (Class XII) 2023 | 89.8%
Shri O.P Jindal Vidya Niketan — High School (Class X) 2021 | 86.2%

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript
- **Frameworks & Libraries:** ReactJS, Node.js, Express.js, MERN Stack
- **Cloud & DevOps:** AWS (EC2, S3, IAM, VPC), Terraform, Docker, Cloud Architecture, Multitenant Environments
- **Databases:** MongoDB, MySQL, Distributed Storage Design
- **CS Fundamentals:** Data Structures & Algorithms, OOP, REST APIs, System Design, Distributed Computing
- **Developer Tools:** Git, GitHub, VS Code, IntelliJ IDEA

EXPERIENCE

Astrea IT Services Pvt. Ltd. – Salesforce Development Intern Jun 2026 – Jul 2026
Salesforce.com Cloud Computing Development Platform

- Completed a hands-on training program on the Salesforce.com cloud computing development platform, gaining practical exposure to cloud-based application development and platform architecture.
- Actively participated in all phases of the training, demonstrating strong conceptual understanding and consistent engagement.

PROJECTS

GLA Exchange – Campus Marketplace Platform Jan 2026 – May 2026
MERN Stack, Socket.io, JWT, Google OAuth, Cloudinary, MongoDB Atlas, Render | glaexchange.online

- Built and deployed a fullstack peer-to-peer marketplace for GLA University students featuring 20+ modules including real-time chat (Socket.io), Google OAuth 2.0, product listings with Cloudinary CDN image storage, and a role-based admin portal serving live users on a custom domain with SSL.
- Implemented production-grade security: Helmet.js headers, rate limiting, CORS whitelist, JWT, input validation, Google Search Console SEO with sitemap.xml, and structured data demonstrating ownership across the full software development lifecycle from architecture to deployment.

EduCloud – Managed Cloud Learning Platform Feb 2026 – April 2026
Collaborative Project | AWS, Terraform, IAM, VPC, EC2, S3

- Architected a cloud platform provisioning isolated, fault-tolerant AWS environments for students using Terraform IaC integrating EC2, S3, IAM, and VPC to deliver secure, cost-controlled multi-tenant workspaces at scale.
- Designed IAM role-based access control and VPC network isolation for multitenant environments, ensuring security and resource separation across concurrent student workspaces mirroring distributed system patterns used in large-scale cloud platforms.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 150+ problems on LeetCode focused on arrays, trees, graphs, and dynamic programming.
- Achieved 880+ rating on Codeforces through competitive programming, demonstrating consistent performance under timed, multi-constraint problem solving.
- AWS Certified Cloud Practitioner (2026): Certified in core AWS cloud concepts, services, and architecture directly relevant to Amazon's infrastructure.
- AWS Certified AI Practitioner (2026): Certified in foundational AI/ML concepts and AWS AI services.
- AWS Academy Graduate Cloud Foundations (Feb 2026): Proficient in cloud computing fundamentals and core AWS services.
- Smart India Hackathon (SIH): Part of a 5-member team that qualified the internal round, demonstrating cross-disciplinary collaboration and delivery under ambiguity.
